PYTHON AI/ML ENGINEER | Machine Learning | FastAPI | Deep Learning

Innovating Python AI/ML engineer with hands-on experience in application design, development, testing and deployment. Skilled in writing clean algorithms, building complex neural networks, and developing ML models using Python. Strong ability to translate real world problems into scalable AI solutions while ensuring performance, reliability, and production readiness.

SUMMARY

- Strong experience in Python Programming, Data manipulation as well as Python libraries such as NumPy, Matplotlib, SciPy, and Pandas for data analysis and numerical computation.
- Proficient in Machine learning and deep learning, Lang Chain, hugging face, RAG based applications.
- Skilled in writing clean, maintainable, and debugging complex systems.
- Hands-on experience SQL, Scikit-learn, TensorFlow, and big data tools in ML workflow.
- Experience developing backend system using FastAPI and integrating ML/LLM model into production ready application.

CORE COMPETENCIES

- Data & Quantitative Analysis
- ML/DL Models Building
- FastAPI backend
- Clustering Models
- LangChain + Hugging Face
- LLM/RAG applications

PROFESSIONAL EXPERIENCE

Trayistats AI Technology, Noida Sec-62

Python AI/ML Developer

- Built FastAPI backend systems and integrated ML/LLM models into production-ready applications.
- Developed and optimized ML models for prediction, data analysis, and anomaly detection.
- Collaborated with managers to define ML objectives and analyze large datasets for scalable solutions.
- Worked on IPRanker:** a threat-detection system identifying proxy, bot, TOR, VPN, and blacklisted IPs using ML/DL with FastAPI-based scoring.

Trayistats AI Technology, Noida Sec-62

05 Aug 2025 – 05 Nov 2025

Python AI/ML Developer Intern

- Engineered and optimized FastAPI-based backend systems to improve integration and scalability.
- Assisted in building ML pipelines for user behavior prediction and anomaly detection.
- Worked on Azure database design, normalization, indexing, and optimization.
- Gained hands-on experience in debugging, API testing, and deploying ML models.

TECHNICAL SKILLS/CERTIFICATION

- Machine Learning (Stanford University – Coursera)
 - Supervised ML (Regression & Classification).
 - Advanced Learning Algorithms.
 - Unsupervised Learning, Recommender Systems & Reinforcement Learning.
- Python Django Certification – ThinkNEXT Technologies, Mohali
- ML/DL:** Scikit-learn, TensorFlow, CNN, RNN, LSTM, Transformers
- MLOps & Deployment:** Docker, CI/CD, Git, GitHub, Model Deployment.
- Backend:** FastAPI, Django.
- Databases:** Azure, ChromaDB/FAISS.
- Tools:** Pandas, NumPy, SciPy, Matplotlib, LangChain, Hugging Face.

ACADEMIC CREDENTIALS

- Bachelor's Degree in Computer Science | AKTU University, Lucknow | 2023

PERSONAL DETAILS

- Languages Known: English & Hindi
